SUMMARY

Software Engineer with a background in product operations and design, skilled in Java, Spring Boot, React, PostgreSQL, and MySQL. Experienced in REST API development, Agile/Scrum collaboration, and responsive UI design. Adept at bridging design and engineering to deliver scalable, user-focused solutions across full-stack applications.

PROFESSIONAL EXPERIENCE

Designer | IGN Entertainment

Jan 2021 - Present

- Delivered design assets in Agile/Scrum workflows, collaborating with developers to align creative deliverables with sprint goals.
- Partnered with engineering teams to optimize asset formats and pipelines, improving delivery speed and technical compatibility.
- Created cross-brand campaign assets that supported major partnerships and boosted user engagement.

Product Operations Coordinator | Humble Bundle

Mar 2018 - Jan 2021

- Partnered with engineers in Agile/Scrum workflows to align sprint deliverables with releases.
- Assisted with QA checks in collaboration with designers and developers, enhancing launch reliability and reducing last-minute issues.
- Optimized asset formats with engineers to improve delivery speed and compatibility.

PROJECTS

NFL Player Scouting App | Java, Spring Boot, PostgreSQL, React

- Built full-stack app with Spring Boot backend and React frontend to track player statistics.
- Automated CSV ingestion into PostgreSQL and exposed REST APIs for data visualization.
- Implemented default value handling for incomplete CSV fields and structured schema updates.

Portfolio Website | React, Tailwind CSS, Spline 3D

- Designed and developed responsive portfolio with reusable React components and 3D model integration.
- Applied modern frontend practices (React hooks, component state management).

Funaway Android App | Kotlin, Android SDK

- Developed Android app with admin reporting features and a user dashboard.
- Implemented a broadcast receiver for notifications and background events.

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Java, JavaScript, Python, SQL | **Frameworks & Libraries:** Spring Boot, React, Tailwind CSS |
Databases: PostgreSQL, MySQL | **Methodologies:** Agile, Scrum | **Tools:** Figma, Adobe Creative Suite |
Certifications: ITIL Foundation Certification, AWS Certified Cloud Practitioner

EDUCATION

Bachelor of Science in Software Engineering

Sep 2025

Western Governors University

- Relevant Coursework in Software Development (Java), Data Structures, Database Fundamentals
